● Ideal for use in the base material

Rebar tying tools

- Up to 5 times faster than manual tying
- Comes with 2 lithium ion batteries
- Ergonomic one-hand operation
- Extra savings by selecting 2 or 3 wraps

Gas nailers for concrete and steel

- Shoots pins up to 65 mm length
- Removable magazine
- Depth adjustment for optimal drive in of pins
- Battery level indication

Hammer drills

- Light in weight and heavy duty
- Depth gauge included
- Extra long cord
- Rotary only drilling mode possible

Impact wrenches

- Square drive
- Ergonomic grip design
- Lightweight
- Heavy duty extra long cord

### Base Materials

Concrete

Masonry

Wood

Chipboard

Metal

Drywall

### About Us

Helical sources and supplies quality products for all types of fixings' applications. Our range of offering includes all types of fixings - screws, bolts, clamps, and anchors for use in construction and industrial applications. We also supply complimenting items like iron hardware, electrical and plumbing hardware, workshop equipment and supplies, drilling accessories, etc.

Having tie ups with several reputed manufacturers in Europe and Asia enables us to have a continuous supply of quality products. Our supply chain ensures that we only source items that are made to specific international standards and approved drawings. This way quality control is assured and the fixing project requirements are met in the most cost effective manner.

Our experienced staff have in depth understanding of the challenges faced when it comes to fixings' applications and our objective is to use this knowledge and experience by working directly with our customers right from the design stages to final installation and assembly. With in-house technical support, we can assist in selecting the right fixing for your application. Design services for products like post installed anchors are also possible along with installation trainings and product testing at site.
